

Table of Contents

Abbreviations	xv
Definition of Terms	xvii
Executive Summary	xxi
CHAPTER I	
Introduction	1
<i>The Problem: One-eyed Decision-making</i>	1
<i>Momentum for Reform</i>	3
CHAPTER II	
The Reality of Production	5
The Market Perspective:	
Production Boundary According to the 1993 SNA	5
The 1993 System of National Accounts and the Tasks Ahead	9
Production Revisited	11
Conclusions	13
CHAPTER III	
Towards a Household Satellite Account	14
Activity Classification for SNA and Satellite	14
SNA activities	16
Satellite account activities	17
Non-SNA/Non-satellite activities	20
Proposed Application in Practice	20
Proposed Classification and Existing	
Activity Coding Schemes	23
Classification of Employment	23
Conclusions	26
CHAPTER IV	
Valuing Non-market Production: Existing Studies	27
Historical Background	27
Gender Division of Unpaid Work	30

National Progress Toward Valuing Non-market Production:	
Unpaid Work Valuations	32
Industrialized country estimates	32
Developing country estimates	35
Valuation Sensitivity Testing	36
Conclusions	37

CHAPTER V

Valuation: Issues and methods	39
Product-based Valuation vs. Wage-based Methods	39
The Evaluation Process	41
Data Needs	43
Output	44
Units of measurements	45
Inputs	47
A Mathematical Presentation	48
Valuation Prices	51
Product Accounting Approach	52
Conclusions	54

CHAPTER VI

Activity and Time-use Measurement	55
Measurement of Behaviour	55
Time allocation studies	57
Descriptive measures	58
Data Collection Instruments	61
Stylized questions	61
Stylized activity list	62
Activity log	64
Stylized time-activity matrix	66
Time diary	69
Population-based Time-use Studies	69
Developed countries	71
Developing countries	72
Observation Studies	74
Continuous observation	75
Random observation	77
Electronic Approaches to Time-use Data Collection	78
Beeper studies	78
Computer Assisted Interviewing	79
Comparative Time-use Analysis and Methodology	80
Stylized vs. diary collection of unpaid work activity time	81
Observation vs. time diary	82
A Comparative Analysis of Results	85

Evaluation of Data-collection Approaches	88
Special Problems and Needs	90
Simultaneous activities	90
Temporal variation	90
Length of time interval	91
Factors in data quality	91
For whom	92
CHAPTER VII	
Expanding the SNA: Directions and Benefits	94
Recommendations	94
Needs and Benefits of Time-use and Valuation Data	95
Facilitating 1993 SNA measurement requirements	95
Time-use data for formulating policies on women	95
Increasing literacy	97
Assessing the importance of transportation sector	98
Accounting for time due to sickness	98
Measuring children's work input and human capital building process	99
Measuring voluntary community services	99
Social and economic change: the Hungarian case	99
Informal sector measurement	101
Benefiting Agencies	102
APPENDICES	105
APPENDIX 1	
Classification of Activities According to INSTRAW Framework	107
APPENDIX 2	
Types of Household Production	113
REFERENCES	115
